

# Feed Sheets

Pull data from our web portal into Google Sheets automatically, at regular intervals.

## How to do get started

First, log into our web portal and navigate to the API Intergrations section, as shown here.

If you do not already use Feed Sheets our our API, you will need to generate an API key by clicking the Generate button as shown here:

A screenshot of the LDR Client API page. The top navigation bar includes links for Inventory, Requests, Buy Shipping, Used / Unsellable, Fulfillment, Reports, Support, and Billing Center. The main content area is titled 'LDR Client API' and describes the client API for integrating with LDR services. It lists three features: integrating return handling, generating discounted shipping labels, and managing inventory. Below this is a section titled 'Using the API' with a note about API requests and documentation. On the right side, there is a 'API Authentication Setup' panel. It contains fields for 'Access Key' (960750) and 'Secret Key' (empty), and a 'Generate' button. The 'Generate' button is highlighted with a red circle. Below this panel is a 'Feed Sheets' section with a note about integrating into Google Sheets and a 'Sellable Inventory Pending Inventory' link.
